

Empathy Map Document

Title: Empathy Map: Salesforce Sales Representative

Project Persona: The Overwhelmed Sales Professional

Empathy Pillar	Detailed Insights
Says	"I am overwhelmed by the volume of raw leads; I spend 60% of my time manually cleaning data and checking lead status rather than closing deals."
Thinks	"I worry that high-potential leads are being lost in the system because I can't reach them fast enough, and I feel unequipped to handle inconsistent data entries."
Does	Spends time manually searching through Salesforce list views, performing repetitive data mapping, manually updating lead stages, and struggling to prioritize leads without clear scoring.
Feels	Frustrated by repetitive administrative tasks, anxious about missing sales targets, and eager for a tool that filters out the "noise" so they can focus on high-intent prospects.

How our AI Solution Transforms their Day:

- **Automated Productivity:** The **Agentforce AI assistant** serves as an "always-on" gatekeeper that qualifies prospects, meaning the sales rep starts their day with a curated list of high-intent leads.
- **Smart Routing:** The **Salesforce Flow automation** ensures that the rep is notified instantly when a "hot" lead is ready, removing the need for manual monitoring.
- **Enhanced Focus:** By standardizing data through AI-driven ingestion, the sales rep can trust the information in their pipeline, leading to higher confidence and improved sales outcomes.
